DETAILED ACTION

Allowable Subject Matter

1. Claims 17-22 are allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claim 18, Rieschick (US#844750) discloses the fastener as a self-locking nut 1 for mating with a threadless lockable member 9 as opposed to a self-locking bolt with a cylindrical threaded part extending from the head and provided with an external thread for mating with an internal thread of a lockable member. Although Vera (US#1923647) does teach the equivalence of a locking function being provided on both a nut (Fig. 5) and a bolt (Fig. 3), there is no motivation to modify Rieschick in view of the teachings of Vera to replace the nut and threadless lockable member with a self-locking bolt with a cylindrical threaded part extending from the head and provided with an external thread for mating with an internal thread of the lockable member. Moreover, the Rieschick invention requires a nut and thus teaches away from the claimed combination which excludes a nut.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
